Sri Nanda Residential School
Percentage: 87

PROJECTS

Toxisafe - Hate Speech Detection System

- Toxisafe is an AI-powered solution designed to detect and prevent toxic speech across digital platforms. It ensures safer online environments by analyzing user-generated content in real-time and flagging harmful language.

- Built using: HTML, CSS, JavaScript, BERT, LIME, Python.

Blood Bank Management System

- This Project was based on a digital platform that streamlines the donation, storage, and distribution of blood. It ensures efficient tracking of donors, inventory, and requests to support timely and lifesaving transfusions.

- Built using: HTML, CSS, JavaScript, PHP, MySQL.

ChatterHealth

- This Project is based on conversational AI platform designed to facilitate healthcare communication-connecting patients, providers, and support systems with ease and security. It streamlines appointment scheduling, symptom tracking, and personalized guidance through intuitive chat interactions, empowering users to manage their well-being more effectively.

- Built using: HTML, CSS, JavaScript, Python, MongoDB.

SKILLS

Technical Skills: Python, C
Relevant Coursework: HTML, CSS, JavaScript, Power BI

Soft Skills: Presentation skills, Communication skills, Teamwork, Leadership.

CERTIFICATIONS

- **Basics of Python:** Infosys Springboard
- **Generative AI:** Infosys Springboard
- **RPA Foundation Certification:** ISB Soft Technology Services

KEY ACHIEVEMENTS

- Served as an event organizer in our department, coordinated and executing departmental events.
- Participated in College level Hackathon and secured top 5**.**
- Delivered Power BI training and presentation session to junior batches.
